

Bangle sizes, how to measure bangles and other relevant details :

If you would like to know how to measure bangle sizes please read below :

Men's bracelets and women's bracelet sizes are given in inches, because they are open, that is they do not have to be slipped over the hand as in case of a bangle, which does not open.

Why do we not show the bangle sizes as bracelet lengths in inches too ? because two wrist size may be identical but the size of the hands may vary, e.g. two women may have the same wrist size, but one may have larger or smaller hands than the other, as the bangles have to be slipped over the hand, it is prudent to take into account the diameter of the bangle which does not open. The bangle sizes are given in diameter, which is the distance measured across the inner diameter of the bangle e.g. size 2-4/16th, 2-6/16th, 2-8/16th in Inches

Bangle

Equals =

Example : 2-4/16th inch is 2 full inches and 4 sections of the 16 sections of an inch shown on the scale

Bangle sizes : conversion from diameter to length or inner circumference.

Description		Diameter	Circumference
		Inches	Inches
		Bangles	Bracelets
Bangle bracelet size	Very small	2-2/16"	6.67"
Bangle bracelet size	Small	2-4/16"	7.06"
Bangle bracelet size	Medium	2-6/16"	7.45"
Bangle bracelet size	Medium Plus	2-8/16"	7.85"
Bangle bracelet size	Large	2-10/16"	8.24"
Bangle bracelet size	X large	2-12/16"	8.63"
Men's bangle or Kara	Large	2-14/16"	9.02"
Men's Kara Large	X large	3.0"	9.42"
